

TRIAL REPORT SUMMARY CANTALOUPES

TRIAL

Trial conducted independently in California, USA in commercial cantaloupe fields.

APPLICATION

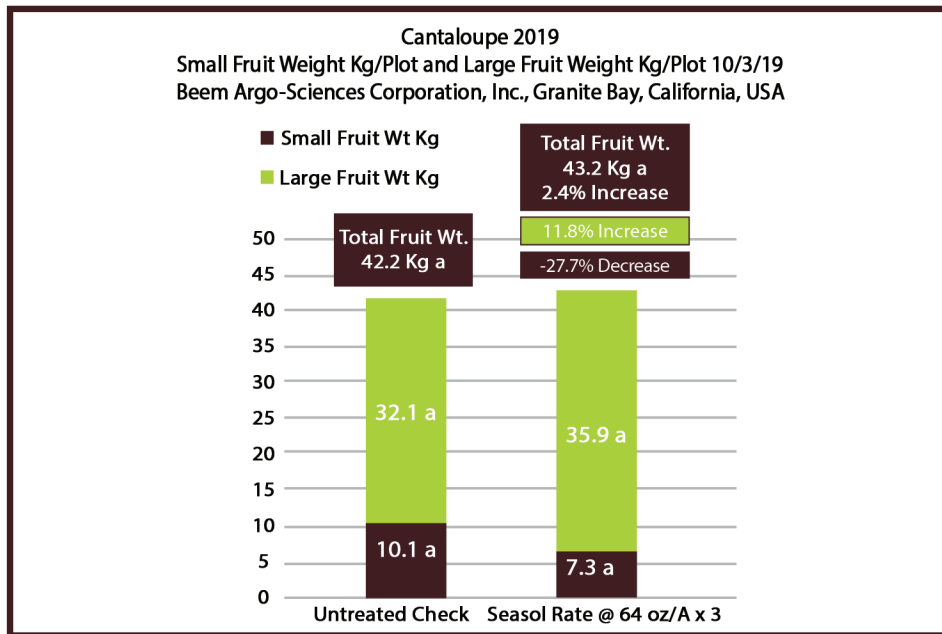

Fertigation application of Seasol at various timings outlined in the below tables.

CONCLUSION

Seasol increased melon weight - decreasing the number of small melons and increasing the count of large melons.

Seasol
(applied every 2 weeks)

Rate	Timing	Method
2 qts/acre	Fifth Leaf	Fertigate
	Beginning Flowering	Fertigate
	Early Fruit	Fertigate

DON'T FORGET THE SEASOL!
Grows Larger Fruit

**LARGER, MORE
UNIFORM MELONS**
