

TRIAL REPORT SUMMARY PISTACHIOS

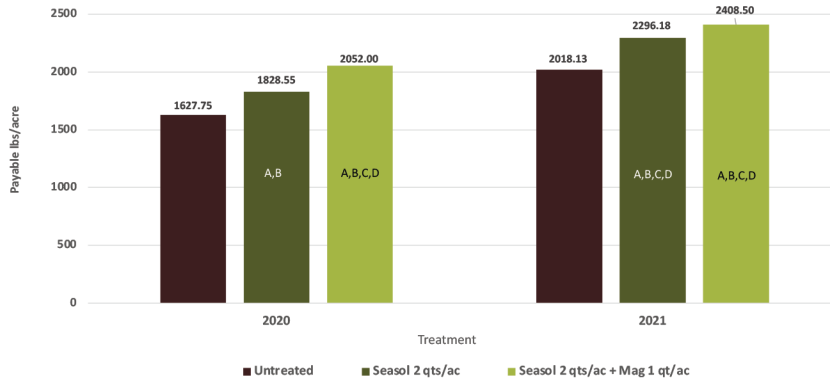

TRIAL OBJECTIVE

- 1) Effect of Seasol Advanced Root Boost (durvillaea bull kelp blend) on pistachio yields.
- 2) Synergistic effect of Seasol Advanced Root Boost with Magnesium on pistachio kernel fill - applied in soil at the beginning of nutfill and 2 weeks later.

CONCLUSION

Seasol Advanced Root Boost applied at traditional bloom timing increases yields over grower standards. Additionally, Seasol synergistically acts with magnesium to significantly increase split when applied during kernel fill timing.

Seasol Effect on Yields Pistachio Trials 2020, 2021

Available as:

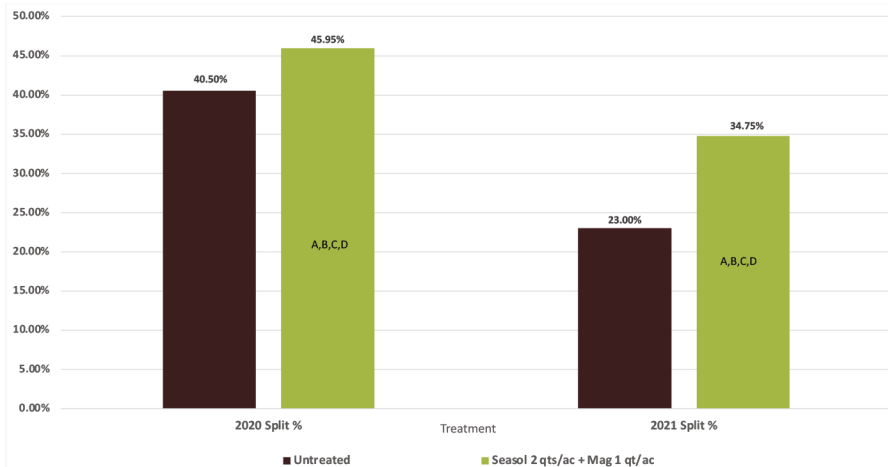

Advanced Root Boost

Organic Root Boost

Seasol + Magnesium Synergistically Effect Splits Pistachio Trials 2020, 2021

Application	Application Timing	Application Placement	
A	Bloom	Soil	Seasol
B	50% Leaf Expansion	Foliar	Seasol
C	Nut Fill #1	Soil	Seasol + Mag
D	Nut Fill #2	Soil	Seasol + Mag
