

TRIAL REPORT SUMMARY TOMATO

TRIAL

2 trials conducted independently in Lodi, CA in commercial tomato fields. 6 replications per trial, 2022 and 2023.

APPLICATION

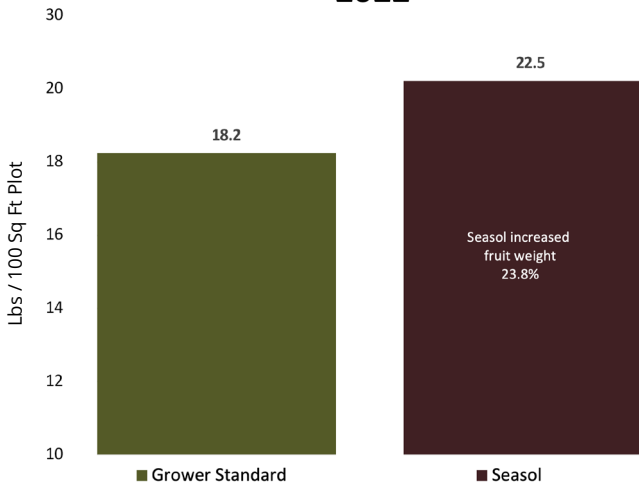

Soil application of Seasol at 2 timings in 2022 and 3 timings in 2023 as outlined in the table below.

CONCLUSION

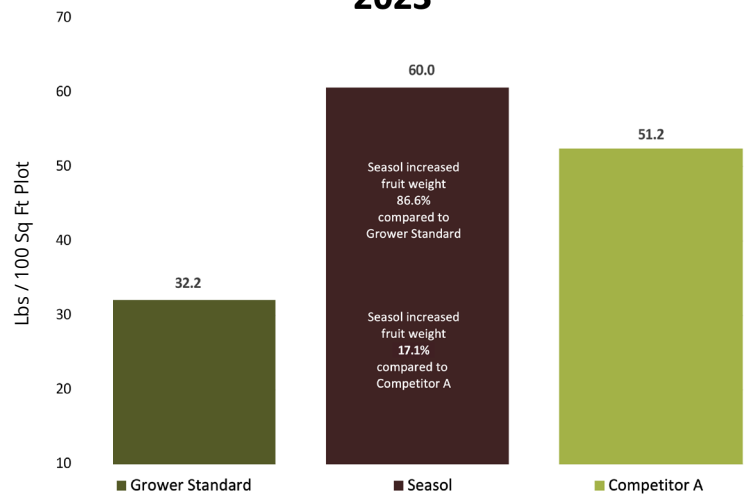

Seasol increased tomato fruit weight and yields in both CA trials.

Tomato Fruit Weight, LBS 2022

Tomato Fruit Weight, LBS 2023

Seasol Applications

Year	Plant Phenology	Method	Rate
2022	At Transplant	Fertigate	2 qts / acre
2022	10 Days after Transplant	Fertigate	2 qts / acre
2023	At Transplant	Fertigate	2 qts / acre
2023	10 Days after Transplant	Fertigate	2 qts / acre
