NOT ALL SEAWEEDS ARE EQUAL

Two Premium Seaweeds.
One Proven Advantage.

Seasol®
THE SEAWEED SOLUTION

BEST EFFICACY. BEST VALUE.

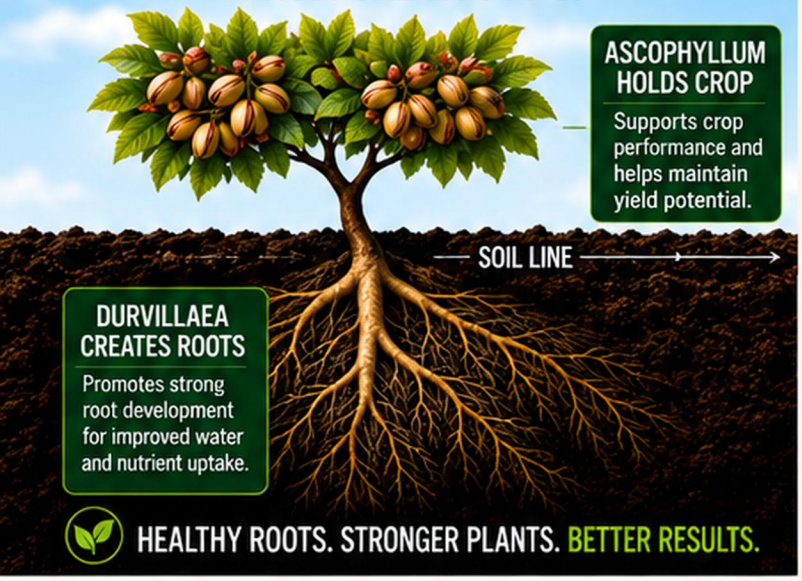
DURVILLAEA CREATES ROOTS

Promotes strong root development for improved water and nutrient uptake.

ASCOPHYLLUM HOLDS CROP

Supports crop performance and helps maintain yield potential during key growth stages.

SUPPORTING CROP PERFORMANCE FROM THE ROOTS UP



HEALTHY ROOTS. STRONGER PLANTS. BETTER RESULTS.

NOT ALL SEAWEEDS ARE PROCESSED THE SAME

	TYPICAL SEAWEED	SEASOL THE SEAWEED SOLUTION
	✗ One seaweed species	✓ Two premium seaweeds (*Durvillaea* + *Ascophyllum*)
	✗ Often diluted with water	✓ Concentrated extract – not diluted with water
	✗ Can clog screens, emitters and nozzles	✓ Filtered to 150 microns for superior flow through irrigation and spray systems.
	✗ Many active components filtered out	✓ Carefully processed to retain the natural benefits of seaweed
	✗ Limited benefits	✓ Supports both root development and crop performance

SEASOL – THE BALANCED APPROACH
Maximum efficacy. Easy application.

CREATES ROOTS
Durvillaea promotes vigorous root development for stronger, more resilient plants.

IMPROVES UPTAKE
Better water and nutrient uptake for improved plant health and productivity.

PREMIUM PROCESSING
Carefully extracted and filtered to maintain natural compounds and ensure consistency.

HOLDS CROP
Ascophyllum supports crop performance and helps maintain yield potential.

WON'T CLOG LINES
Filtered to 150 microns for superior flow through irrigation and spray systems.

BEST VALUE
Concentrated extract means more active seaweed per gallon for more value.

DURVILLAEA CREATES ROOTS.
ASCOPHYLLUM HOLDS CROP.
That's the Seasol Difference.
